

PUNIT SHUKAL

Tempe, AZ, 85288 | punit.n.shukal@gmail.com | (602) 614-6398 | LinkedIn: [punit-shukal](#)

SUMMARY

Graduate student in Computer Software Engineering at ASU with skills in Python, Java, C++/C#, cloud-technologies, React, SQL, REST

EDUCATION

Master of Science in Computer Software Engineering <i>Arizona State University</i> Selected Coursework: Adv DSA, Software Verification Validation and Testing, Foundations of Software Engineering, Game design & development.	May 2026 3.63 / 4.0
Bachelor of Technology - Information Technology Engineering Minor in Artificial Intelligence and Machine Learning <i>University of Mumbai, Mumbai, India</i> Selected Coursework: Software Engineering, DSA, Advanced DBMS, Operating Systems.	Jun 2024 3.56 / 4.0

TECHNICAL SKILLS

Technical Languages:	Java, Python, SQL, C++, C#, Lua
Web Technologies:	JavaScript, HTML5, CSS3, Bootstrap, JSON, React.js, Node.js
Technologies:	GIT, Tableau, Distributed System, RESTful Services, Pandas, Numpy, Agile
Databases:	MySQL, PostgreSQL, MongoDB, Firebase, Supabase, SPARQL, NoSQL
Game Dev	Unreal Engine, Unity, Unity SDK, Renpy, Game Development, Visual Scripting, Level Design

PROJECTS & CERTIFICATIONS

Health Guardian AI /Python, FastAPI, React Native, Supabase, Google Gemini API/ <i>SunHacks MLH Hackathon</i> - Built an AI-powered dietary recommendation system that analyzes scanned food items against user medical conditions, lab reports, and vitals to generate real-time personalized nutrition insights. - Designed an end-to-end health reasoning pipeline (food detection > nutrition analysis > risk scoring > LLM recommendations) using FastAPI, Supabase, and Google Gemini, delivering structured JSON outputs optimized for mobile apps. - Implemented lab report parsing and color-coded health risk classification, enabling interpretable dietary safety feedback and AI-generated healthier alternatives within a React Native mobile interface.
MoneyNest – AI-Powered Financial Wellness Platform /Next.js 15, Supa base, Claude API, Gemini API, Eleven Labs, TS, React/ <i>Innovation Hacks</i> - Engineered a financial learning platform with 6 gamified financial literacy modules, tightly integrated with AI-generated nudges and personalized recommendations based on user behavior and progress. - Built a full-stack web application with budget tracking (manual + CSV import), dynamic action plan generation and reactive AI feedback loops, creating a unified product experience where gameplay, analytics, and coaching continuously reinforce each other.
Drowsiness Detection System /Python, OpenCV, Eye Aspect Ratio (EAR), Google Maps API/ - Implemented a real-time facial monitoring system that calculates the Eye Aspect Ratio (EAR) to detect driver drowsiness. Automated alert mechanisms by triggering an alarm and integrating Google Maps API to display nearby hotels upon detection. Optimized detection accuracy by fine-tuning EAR thresholds, improving real-time responsiveness.

Endstar GameDev Spark-Challenge Hackathon ASU: First rank in Capstone Track	Feb 2025
Xbox GameCamp 25 Hackathon ASU: First rank in Theme Track	May 2026

PROFESSIONAL EXPERIENCE

WEB DEVELOPER INTERN <i>Nextgen Techno Ventures, Mumbai, India</i> Tech: HTML, CSS, JavaScript, Figma, ReactJS, MongoDB, Rest APIs, SEO, GIT - Conceptualized and designed website layouts using Figma, ensuring intuitive user interfaces and seamless navigation with design that aligned with client branding. - Developed dynamic, user-centric web applications using ReactJS, integrating MongoDB for efficient backend data management. Optimized website performance, responsiveness and SEO. Ensuring cross-device compatibility and fast load times.	Jan – Apr 2024
--	-----------------------

OTHER WORK EXPERIENCE

GRAPHIC INFORMATION TECHNOLOGY COURSE GRADER <i>ASU, Tempe, USA</i> GIT Courses: 215 - Introduction to Web Authoring, 337 - Web Content Design, 515 - Website Design/Internet/Web. - Evaluated classwork of more than 400 students. Including projects and assignments with a keen focus on Web Design Principles, Code Structure, Responsiveness & SEO Effectiveness, Accessibility, delivering constructive feedback to enhance student learning. - Assisted in teaching Web development fundamentals, how to use GitHub, Visual Studio Code and relevant extensions, Publish Web Pages, CSS Debugging.	Jan 2025 - Present
